

Introducing The  
DataTech Startup  
That Has Disrupted  
Freight Procurement!

[www.sleek-technologies.com](http://www.sleek-technologies.com)

Named 2022 SupplyTech  
**Procurement Solution of the Year**

As the leader in advanced freight procurement data & AI-powered freight procurement automation, we help shippers always deliver goods on-time, at a fair market cost.

We are 100% confident that we will improve both price and service levels, or a credit will be refunded.

## What [Really] Makes Us Different?

Our data helps shippers optimize their entire carrier network with actionable proof points that level-set truckload price and demand stronger service levels.

Our automation software saves time by eliminating manual, repetitive tasks such as shipment tracking, and invoice management.

Our AI-machine dynamically finds, vets, and onboards new compliant carriers in seconds and eliminates the need for brokers, RFPs, and spot quoting.

Reduces cost by

**15%+**

Reduced work by

**6 Hrs**  
per person/ per week

improves service to

**98%+**

Generate

**4X**

ROI in 30 days

# A Sleek Success Story: Milk Specialties Global [MSG]

\$725M manufacturer of hydrolysates, milk, and specialty protein products headquartered in Eden Prairie.

By optimizing freight procurement, MSG has...

- reduced truckload cost by 15%+.
- improved on-time delivery to 98%+, when market avg sits at 85%.
- saved up to 6 hours per person per week in manual work.
- generated 4X ROI in 30 days.

“Implementation was easy and the impact on cost & time savings has been huge.”

- Randy Klein, Transportation Director at Milk Specialties

**The Challenge:** MSG was struggling with fluctuating truckload costs. They did not have tools or data to identify true market cost to know when/if they were over or under paying to ship goods.

**The Solution:** MSG seamlessly integrated automation software into their TMS. By dynamically finding, vetting, and transacting with compliant carriers, MSG uncovered resilience, cost reduction, and sustainability

**The Result:** Pilot went live 9/9/22. Sept generated 13% truckload savings, and 100% OTD. As AI learned, Oct savings grew to 19% and OTD remained at 100%. Automation generated 4X ROI in 30 days, which paid SaaS licensing fee for the entire year. Since then, MSG has eliminated all brokers. They continue to generate truckload savings, and deliver industry-best service levels (market average is 85% OTD). And with 100% data transparency, they now have actionable insights to help level-set expectations with their entire carrier network.

	Sept 2022 - March 2023
# of Load	569
Savings %	14.7%
Service [OTD] %	97.6%

# SPECIAL ENTERPRISE BUNDLE

## Data & Software benefits include:

- ✓ Lane Analysis
